1.	Standard cup	(group 2)
2.	Large cup .	(group 2)
3.	Hot water	
4.	Cleaning of mixing system.	
5.	Ready lamp	

- The lamp lights constantly when the machine is ready.
- The lamp blinks when a drink is being poured.

1. Place the machine on a flat waterproof surface.

Connect the plug to an **earthed 230V 10A wall outlet.**

Note: Make sure air is able to circulate freely behind the machine.

2. Connect the factory-supplied tube to the **cold water feed** using a ½" R- connection piece. Make sure no folding or sharp bending occurs when you push the machine back in place.

If the water pipeline is new, flush the system with water first to remove copper shavings. These can damage the inlet valve.

3. Open the water tap.
4. Hit the ON/OFF switch inside the panel.

The water tank will fill automatically with 1.8 litres of water.
The element will not be powered until the water reaches the level indicator.

The temperature is set to 85⁰ Celsius.

5. Shut the panel door.
